

SAMEER AHMED SIDDIQUI

Full-Stack Developer · Angular & .NET Core

sameer_as@live.com | +92 335 272 2195 | Karachi, Pakistan | [linkedin.com/in/sameerahmedsiddiqui](https://www.linkedin.com/in/sameerahmedsiddiqui) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-stack developer with 3+ years of experience building enterprise-grade web applications using Angular and .NET Core. Proven track record delivering CRM systems, HRMS platforms, and kiosk applications at scale. Experienced in RESTful API design, third-party integrations (Mailgun, SendGrid, Postmark, AWS S3), and the full software development lifecycle. Collaborative team player familiar with Agile workflows and Git-based version control.

PROFESSIONAL EXPERIENCE

Software Engineer | [Astrik Digital](#)

Jul 2023 – Jun 2026 · Karachi, Pakistan

- Architected and developed a new Admin CRM from the ground up using Angular (frontend) and ASP.NET Core Web API (backend), improving internal operational efficiency.
- Built and maintained enterprise applications including a CRM, Kiosk System, and HRMS Attendance Tracking System using ASP.NET Web Forms and ASP.NET Core MVC.
- Designed and implemented RESTful APIs enabling seamless frontend-backend communication; documented endpoints for cross-team use.
- Integrated transactional email services — Mailgun, SendGrid, and Postmark — into the CRM, reducing manual communication overhead.
- Managed file storage and asset delivery using AWS S3 Buckets, improving media handling performance across applications.
- Implemented Windows Services and Webhooks to automate background processing tasks and handle real-time event-driven workflows.
- Collaborated using Git for version control; participated in code reviews and followed Agile sprint cycles.
- Optimized SQL Server queries and database schemas, contributing to measurable improvements in application load times.

E-Commerce Virtual Assistant | [Amazon FBA / FBM \(Freelance\)](#)

2021 – Jun 2023 · Remote

- Managed product listings, inventory, and order fulfilment across FBA and FBM channels for multiple clients.
- Used data-driven approaches and automation tools to improve listing performance and reduce fulfilment errors.
- Developed organizational and client communication skills transferable to software project coordination.

TECHNICAL SKILLS

Frontend	Angular, HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap, AJAX, JSON
Backend	ASP.NET Core Web API, ASP.NET Core MVC, ASP.NET Web Forms, C#, Entity Framework Core
Database	MS SQL Server (queries, stored procedures, schema design)
Cloud & DevOps	AWS S3, Git / GitHub, CI/CD basics, Windows Services, Webhooks
Integrations	Mailgun, SendGrid, Postmark, RESTful APIs, Third-Party API Integration
Tools & Methods	Agile / Scrum, Postman, Visual Studio, VS Code
Other	Python (scripting), JSON, AJAX

EDUCATION

BS Computer Science (In Progress)

Iqra University · Karachi, Pakistan

2023 – Present

PERSONAL & FREELANCE PROJECTS

LogoNDesign · ASP.NET WebForms, SQL Server

A comprehensive design platform for creating and managing logos and branding materials. Built with WebForms and SQL Server for robust content management and user data storage.

DesignAndCodeLab · ASP.NET WebForms, SQL Server

An interactive educational platform combining design resources with coding tutorials and tools. Developed using WebForms and SQL for seamless content delivery and user engagement.

DesignNagArtistry · Next.js, PostgreSQL

A modern portfolio and showcase platform for digital art and design work. Built with Next.js and PostgreSQL for optimal performance, SSR, and dynamic content management — demonstrating cross-framework versatility beyond the .NET stack.

Car-Chatbot · Python, ChromaDB, NLP

An intelligent chatbot specializing in automotive information and assistance. Leverages ChromaDB for vector-based knowledge retrieval and natural language processing to deliver context-aware responses.

Mouseover · C#, WinForms

A desktop automation utility built as a WinForms application for automated mouse movement and control, assisting with repetitive task automation.

DesignNagar · ASP.NET WebForms, SQL Server

A community platform for designers and artists to showcase work and collaborate. Developed using WebForms and SQL database for user management, authentication, and content storage.
